Education

2018 – Today 📖 Integrated Master's Student of School of Electrical and Computer Engineering, National University of Athens (NTUA)
Major : Computer Science
Expected Final **GPA** : 9.8/10 (10 being the best possible grade and 0 the worst)
Integrated Master's in ECE at NTUA is essentially equivalent to M.Sc. and MEng. degrees of Technical Universities.
Master's Thesis Title: *Smart data selection for LLM pretraining towards OOD generalization*
Work in progress at EPFL under the supervision of Prof. Martin Jaggi (Nov. 2024 - Jun. 2025).
Expected to complete degree requirements and graduate by the end of Spring Semester of 2025.

Research Experience

Summer of 2024 📖 **EPFL** Research Intern

- Advisor : Prof. Ola Svensson
- Explored the use of Large Language Models (LLMs) for optimizing Mixed Integer Programming (MIP) problem formulations to improve solver efficiency.
- Investigated downsizing Integer Program (IP) instances using Neural Networks (NNs).

Summer of 2023 📖 **EPFL** Research Intern

- Advisor : Prof. Antoine Bosselut
- Explored methods to enhance the quality and relevance of images generated by state-of-the-art text-to-image models (Stable Diffusion). Used techniques to expand input text prompts using relevant commonsense knowledge and a lightweight transformer-based adapter to produce enhanced text embeddings and align them with the CLIP embedding used in Stable Diffusion.

Work Experience

Summer of 2022  **Hellenic Drones** Machine Learning Engineer Intern

- Worked on developing a real-time system for aerial object detection and tracking by integrating YOLOv5 with DeepSORT. Achieved 87% accuracy in aerial object classification and improved tracking performance in occlusion-prone scenarios. Our model was deployed on the company's drones for aerial surveillance.

Hellenic Drones is a startup in Athens collaborating at the time with members of the Artificial Intelligence and Learning Systems (AILS) lab at NTUA.

Volunteering

Teaching Assistant  **Greek National Olympiad in Informatics Workshops**

- Explained algorithmic methods and example problems to high school students and assisted them during practice sessions held at NTUA.

These workshops are organized every year by Profs. Dimitris Fotakis, Nikolaos Papaspyrou, and Aris Pagourtzis of NTUA.

Skills

Languages

- **English:** Proficient in reading, writing, and speaking (Certificate of Competency in English, Michigan Language Institute).
- **French:** Basic understanding of spoken and written French; completed 3 years of French classes during high school.
- **Greek:** Native speaker.

Coding

Python, C++, SQL, L^AT_EX.

Databases

Experience in MySQL, PostgreSQL, SQLite.

Web Dev

Experience in HTML, CSS, JavaScript.

Communication

Collaborated on multiple group projects at NTUA, coordinating with team members to achieve project goals on time.

Personality Traits

Curious, energetic, perspective, persistent.

Hobbies

Traveling, hiking, running, music, photography, books, languages.

Misc.

Academic research.
